• Python – Basic

EXPERIENCE

Frontend Development Intern

Maxim Code | Remote | Jun 2026 – Jul 2026

- Developed responsive web interfaces using HTML5, CSS3, JavaScript, React, and REST APIs.
- Used Git/GitHub for version control while debugging and optimizing frontend components.

Computer Instructor (Full-Time)

Matrutva Vidyalaya | 2023 – 2024

- Trained 50+ students in computer fundamentals while strengthening communication and problem-solving skills.

EDUCATION

Master of Computer Applications (MCA)

LJ Institute of Computer Applications | Expected Graduation: 2027

Bachelor of Computer Applications (BCA)

Gujarat University | 2024

CERTIFICATIONS

- UI/UX Design – Coursera
- Frontend Development – Coursera
- SEO - Coursera

PROJECTS

Synovia AI – AI Web Platform

Technologies: React, Tailwind CSS, JavaScript, REST API

[GitHub Repository](#) | [Live Demo](#)

- Developed a responsive AI-powered web platform with a modern, user-friendly interface.
- Built reusable React components and responsive layouts using Tailwind CSS for consistent performance across devices.
- Integrated APIs and dynamic frontend functionality to deliver interactive AI-based features and a seamless user experience.

Code Editor Web App

Technologies: HTML, CSS, JavaScript

[GitHub Repository](#) | [Live Demo](#)

- Built an in-browser code editor with real-time preview, enabling instant testing of HTML, CSS, and JavaScript changes.
- Optimised layout for responsiveness and consistent performance across devices.

Weather Mood App

Technologies: JavaScript, API Integration

[GitHub Repository](#) | [Live Demo](#)

- Developed a smart mood-based web application integrating weather APIs and user input to generate personalised recommendations.
- Implemented keyword-based sentiment analysis and real-time data fetching to enhance user experience
- Integrated external platform links (Swiggy, Spotify, Maps) for seamless interaction and improved engagement
